DETAILED ACTION

Remarks

In response to communications files on December 14, 2009. Claims 1-3, 5-6, 8-9, 11-15, 17-19, 21-22, 24-26, 28-30, 32-34, 37, 39-41 are amended and claims 4, 16, 23, 31, and 35 are cancelled by applicant request. Therefore, claims 1, 2-3, 5-6, 8-15, 17-22, 24-26, 28-30, 32-34, 36-37, and 39-41 are presently pending in the application.

Reasons for Allowance

1. Claims 1, 2-3, 5-6, 8-15, 17-22, 24-26, 28-30, 32-34, 36-37, and 39-41 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: the prior arts of records, neither anticipates nor renders obvious the following limitations as claimed:

As to claims 1 and 32, the prior art of records fail to anticipate or suggest a computer system that enforces user specified currency constraints on a query on a database system having a query optimizer, a query processing engine and one or more local replicas of data in remote data sources:

a query plan generator that constructs a query plan for executing the query, wherein the query plan includes one or more subplan selection operators that check a currency of an individual local replica against the at least one individual user specified currency constraint and selects the subplan using the individual local replica only when the constraint is met; and wherein the query processing engine executes the query plan, including the one or more subplan selection operators, thereby producing a result that satisfies the query's currency constraints;

a heartbeat mechanism that includes a global heartbeat table and local replicated heartbeat tables that keep track of at least one individual local replica's currency, together with the other limitations of the independent claims.

As to claims 13 and 20, the prior art of records fail to anticipate or suggest a method comprising:

verifying the query execution plans against the consistency constraint and rejecting individual query execution plans that do not meet the consistency constraint; and
executing the query plan, including any subplan selection operators, thereby producing a result that satisfies the currency constraint and the consistency constraint; and
maintaining global and locally replicated logs of an update status of individual currency regions associated with the local replica or at least one other local replica, together with the other limitations of the independent claims.

As to claim 21, the prior art of records fail to anticipate or suggest computer readable media comprising: parsing the consistency constraint; constructing a query plan for executing the query, wherein the query plan includes a subplan selection operator that checks a currency of a local replica against the user specified currency constraint and selects a subplan using the local replica when the user specified currency constraint is met; executing the query plan, including the subplan selection operator, thereby producing a result that satisfies the user specified currency constraint; and grouping tables in local data sources into currency regions,

wherein individual tables within an associated currency region include data that corresponds to a same database state, together with the other limitations of the independent claims.
